

Education today must inspire children to think and foster talents. It must help the child discover his full potential. Students in the 21st century are faced with challenges of learning about an interconnected world where knowledge is constantly evolving and the world is taking the shape of a global village.

Empowering and mentoring our students to become leaders of the world has been our vision at Vidya Vikasini School (ICSE). **Our International policy** is therefore as follows:

- Preparing the students to have their **skills in multiple spheres**- intellectual, emotional, socio- cultural and political.
- To regularly **audit and identify opportunities for developing an international dimension** throughout the curriculum.
- To **foster and encourage positive attitudes** to take part in the global community as lifelong learners.
- To **enable students to see themselves as citizens of a global world** whilst respecting and safe guarding their own culture and ethnic diversity.
- **Strengthening the cross - cultural skills and networks** enabling a **robust exchange of ideas** expanding as pupils educational opportunities and **enriching our classrooms** with diverse perspective that enable our students to evoke as global citizens who are well balanced and responsible.
- **Raising student's awareness and understanding about the complex global environment** - its issues and challenges such as economic development, poverty, energy crisis, environment etc. and making the students proactive in addressing the same .
- **Integrating core skills** such as Critical Thinking and Problem Solving, Creativity and Imagination, Collaboration and Communication and Student Leadership into the school curriculum on a regular basis to **enable students to become globally competitive in the 21st century.**
